The 'Start screen'

1.2 ADD POINTS

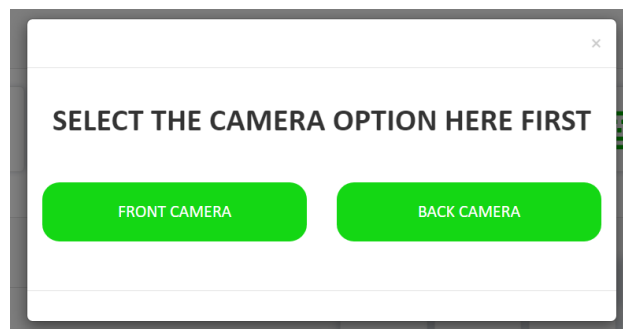

- ✓ Klick on the 'White' card

1.2.1 Select Camera

- ✓ Select 'FRONT CAMERA' to scan the card along the screen side (also works on a laptop!)
- ✓ Select 'BACK CAMERA' to scan the card along the 'back' of the tablet.

TIP: To change the setting to 'BACK CAMERA', you must first log out and log in again.

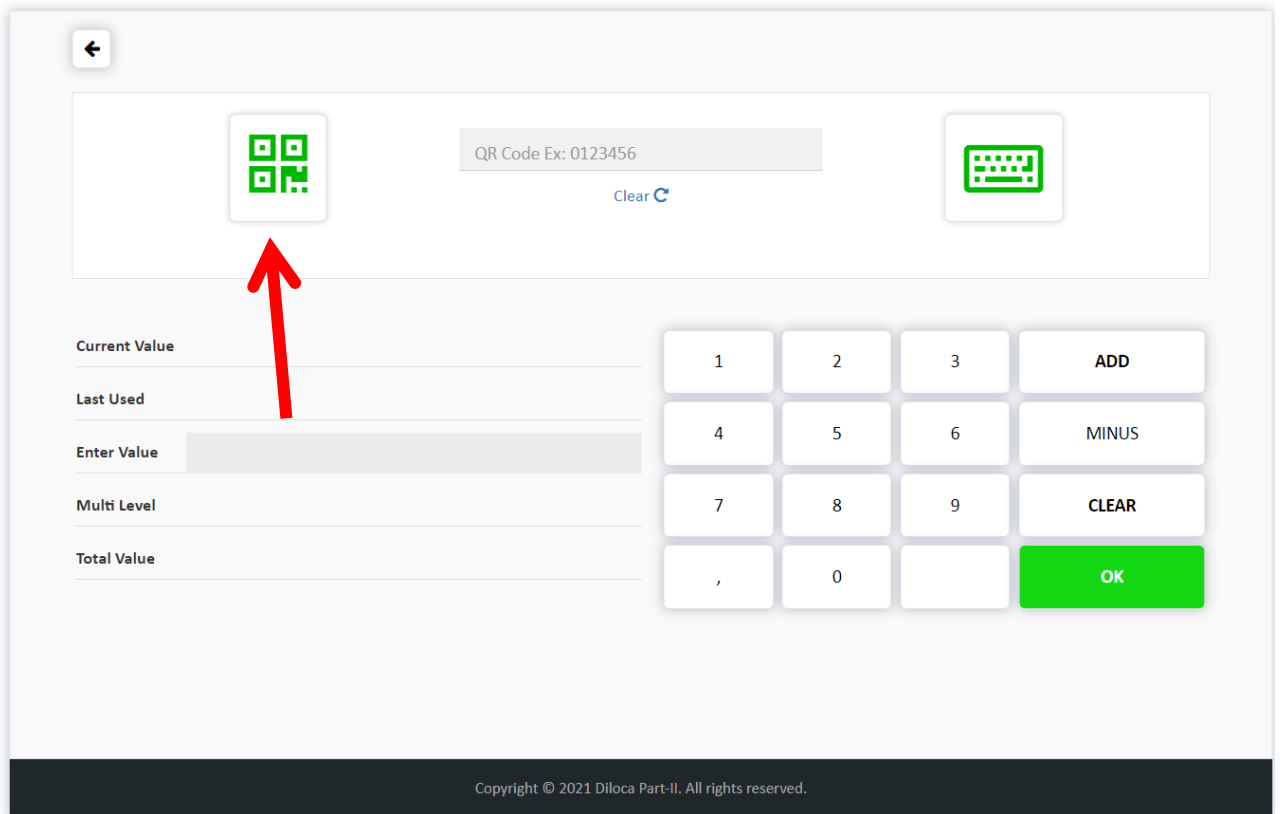

1.2.2 Scanning the Card

- ✓ Choose the desired type: 'QR code' or 'Barcode'

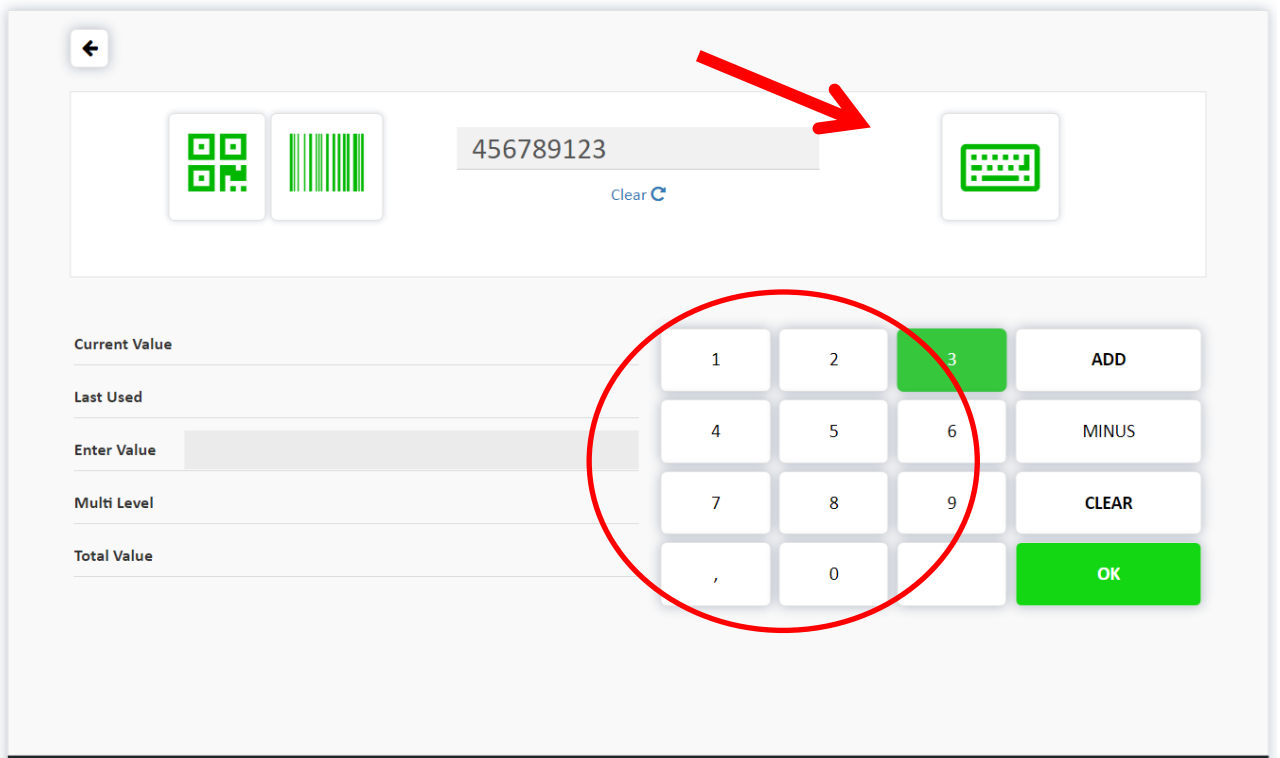

- ✓ Click the button to run the scan

- ✓ Scan the Card

1.2.3 Enter number manually

- ✓ You can also enter the number of the card MANUALLY.
- ✓ Enter the number via the provided keyboard. Then click on the 'keyboard' icon to confirm.

1.2.4 Add Points (ADD)

Once the code has been entered (via scan or manually) you will get this overview.

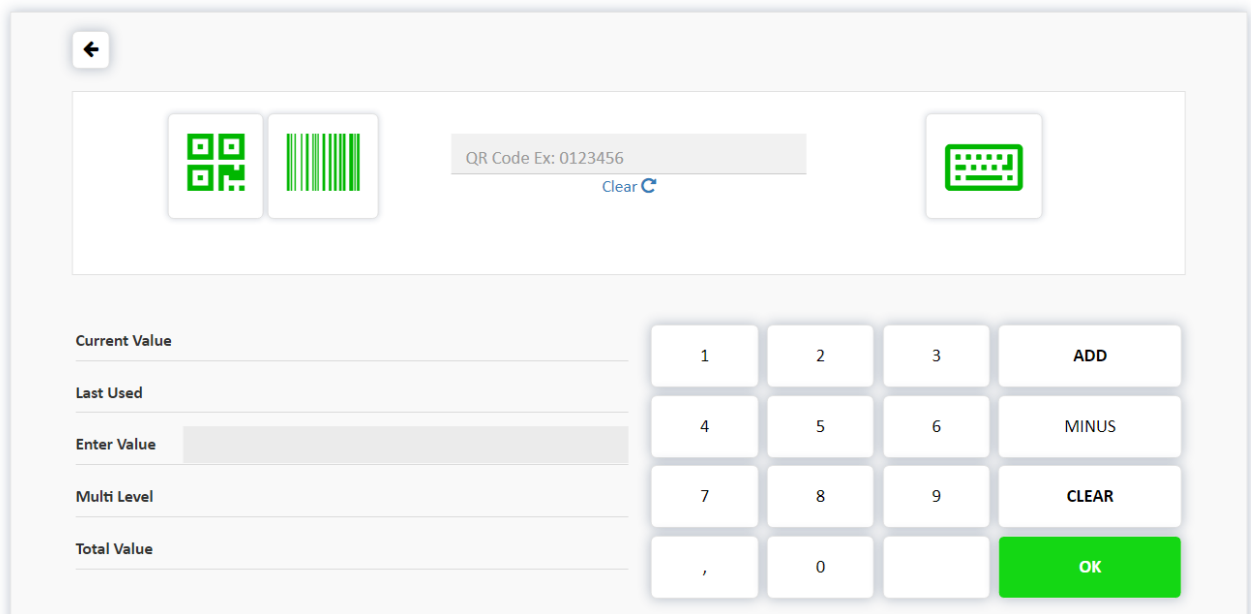

- **Current value:** current points saldo
- **Last Used:** last transaction
- **Enter Value:** number of (still) entered points
- **Multilevel:** 100% (see further on 2.3.2 Multilevel)
- **Total Value:** a provisional total of the new balance

The screenshot shows a mobile application interface for adding points. At the top, there is a back arrow, a QR code icon, a barcode icon, a text input field containing the number '456789123' with a 'Clear' button, and a keyboard icon. Below this, the user's name 'Name: Tim Boektoe' and birthdate 'Birthdate: 2020-01-01' are displayed. The main area contains a list of fields: 'Current Value' (700,00), 'Last Used' (2022-11-17), 'Enter Value' (empty), 'Multi Level' (100%), and 'Total Value' (700,00 P). To the right is a numeric keypad with buttons for digits 1-9, a comma, 0, and function buttons 'ADD', 'MINUS', 'CLEAR', and 'OK'. A red arrow points to the 'ADD' button.

- ✓ Add the number of points via the keyboard (example 100 points)
- ✓ Click on 'ADD' ('Total Value' will be increased by 100 points)

This screenshot shows the same interface as the previous one, but with the 'Enter Value' field now containing the number '100'. A red arrow points to this field. Another red arrow points to the 'OK' button on the numeric keypad. The 'Total Value' has been updated to '800,00 P'.

- ✓ Click on 'OK'.
- ➔ Points have been permanently added and stored in the database. Afterwards you will see a blank screen for a new transaction.

1.2.5 Subtract points (MINUS)

You can also deduct points via the '**MINUS**' button. You work in the same way as with Add Points.

1.2.6 Corrigeren (CLEAR)

→ '**CLEAR**' serves to delete an incorrectly entered amount.

Example: you want to enter 150 points instead of 50 points.

- ✓ Press '**CLEAR**' and the 'Enter Value' field is empty again.
- ✓ Then enter the desired amount.

Current Value	700,00
Last Used	2022-11-17
Enter Value	50
Multi Level	100%
Total Value	700,00 P

Current Value	700,00
Last Used	2022-11-17
Enter Value	
Multi Level	100%
Total Value	700,00 P

Current Value	700,00
Last Used	2022-11-17
Enter Value	150
Multi Level	100%
Total Value	700,00 P

→ '**CLEAR**' also works if you have made an incorrect calculation (ADD/MINUS)!

Example: You want to DEDUCT points but you accidentally pressed '**ADD**'. The 'Total Value' now stands at 750 points instead of 700 points. And you haven't pressed 'OK' yet.

- Press 'CLEAR'. 'Enter Value' is empty. ALSO the 'Total Value' is 'ADD' undone!
- Enter the amount again (50) and press 'MINUS'. 'Total Value' is now at 650 instead of 700 points.

Current Value	700,00
Last Used	2022-11-17
Enter Value	50
Multi Level	100%
Total Value	750,00 P

Current Value	700,00
Last Used	2022-11-17
Enter Value	
Multi Level	100%
Total Value	700,00 P

Current Value	700,00
Last Used	2022-11-17
Enter Value	50
Multi Level	100%
Total Value	650,00 P

- Press 'OK' to save permanently.
